Atelier Ten

Hanover Lodge, Regents Park, London

Darke & Taylor managed the installation of lighting, power, fire alarm, security, audio-visual and data systems to this extensive refurbishment of an early nineteenth-century mansion house, sitting in 2 acres of grounds on the Outer Circle of Regents Park.

“Hanover Lodge in Regent's Park, central London, is set to become the most expensive house in Britain when it is sold in the next few days for £120m.”

Project Scope:

- Mains Infrastructure
- Small Power Installation
- Specialist Architectural Lighting
- Systems Integration
- Controls Wiring
- Fire Alarm
- Security & Access Control
- External Lighting Scheme
- Power to Mechanical Plant

Further Details:

Darke & Taylor Ltd were engaged over a 3 year period to undertake a comprehensive electrical services installation to this private residence of the highest quality. The project required the management of a number of specialist contractors who worked closely with our site and management team to integrate high quality and state of the art audio visual, lighting and security systems to a project which included the renovation of original buildings which were commissioned in the 19th Century by the Prince Regent as a private guest villa.

Hanover Lodge: chandelier and specialist lighting to compliment the award winning plasterwork
